Split Payments
50% on Delivery
50% Jan 2018**

**On-the-go
Protein, Oil and Moisture
Analysis
with
Real Time Protein Mapping**

Make Every Header Box Load Count:

Typically farmers who have installed a CropScan 3000H realise a payback within the first harvest. This years' grain harvest could see a big difference in the price between ASW to APW or H2 grades. The CropScan 3000H allows farmers to blend grain in the paddock and make decisions on every header box of grain in order to get the best price for their grain.

Order the CropScan 3000H On Combine Analyser by October 20th, 2017 and we will split the payments.

Pay 50% on delivery... and 50% by Jan 12th, 2018.
